

561 E. Garden Drive, Unit C
Windsor, CO 80550

To whom it may concern,

We are writing this letter in cooperation with the Town of Windsor to inform you of the upcoming Electrical Code Adoption. We are glad to announce that starting January 1st, 2021 we will begin enforcing the 2020 National Electrical Code (NEC).

The current building codes and energy codes adopted by the Town will remain in effect. This code adoption is only for updated version the electrical code recently adopted by the State Electrical Board.

We are providing a list of high impact electrical code changes in residential construction. Please let us know if you have any additional questions on the code changes. There are several publications that various organizations have issued to itemize all significant changes if you choose to purchase those for your reference. All new and existing electrical code requirements can be found in the 2020 NEC.

All permit applications submitted on or after January 1, 2021 will be processed under the 2020 NEC. The plans submitted with these applications will need to reflect the 2020 NEC, and inspections performed on these permits will follow the 2020 NEC.

If we can answer further questions, please contact our Windsor Office Team at windsor@safebuilt.com.

Sincerely,

Caleb Sulzen

Building Official
