

**POLICY REGARDING REQUIREMENTS FOR POND CERTIFICATIONS FOR
THE
TOWN OF WINDSOR**

DETENTION POND CERTIFICATIONS

A Detention Pond Certification shall be prepared by a licensed professional engineer, submitted to and approved by the Town prior to issuance of a Certificate of Occupancy for any multifamily, commercial or industrial project which includes construction of a storm water detention pond as part of the improvement plans for the site. The certification shall include the following:

- 1) A letter signed by a licensed professional engineer indicating that the detention pond has been constructed and will function in substantial conformance with the design approved by the Town. The letter shall include such things as the proposed and existing volume of the pond, the design and recalculated water surface elevations for the design storms, the top of bank elevations on the pond perimeter, the as-built elevations of the outlet structure, the installation and size of the orifice in the outlet structure and the size of the outlet pipe.
- 2) Calculations to support the as-built pond volume.
